

Multispectral LED Light Source Unit

LSU COLORS Series

- High-Efficiency Tri-LED Optical Engine**
 Delivers ultra-high brightness (>5M Lux), high-density output (>2M Lux @ 6Ø fiber), and long lifetime exceeding 30,000 hours.
- Enhanced Multispectral Inspection**
 Improves accuracy in material differentiation, color filter analysis, and defect detection.
- Optional Brightness enhancement module**
 Compatible with 12Ø and 14Ø fiber light guides, offering an additional 60% to 100% increase in illuminance.
- Versatile Communication Interfaces**
 Includes standard USB interface, with optional RS232 and Ethernet connectivity.

Product Model

LSU2	—	200	—	RGB	—	☐
Model Name High Power Light Source Unit		Output Power 200 = 200W		LED Color R/G/B Tri-LED Optical Engine		Reserved Identify code
